

Packages - Bug #1007

[log4net] Required manual download

2016-05-08 02:41 PM - kete

Status: not-a-bug	% Done: 0%
Priority: bug

Description The log4net signature did not check out. I deleted, populated, and refreshed my keys, and pacman2pacman could not move log4net to /var/cache/pacman/pkg. "failed to commit transaction (error invoking external downloader)" Other smuxi dependencies installed fine. I manually downloaded and installed log4net through 'pacman -U'. I think bypassing the signature is a security vulnerability.
