

## Servers - Bug #1015

### [mediagoblin] add GNU MediaGoblin

2016-05-23 07:38 PM - Anonymous

<b>Status:</b> open	<b>% Done:</b> 0%
<b>Priority:</b> feature	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Description</b> <p>Since wiki is limited, i suggest GNU MediaGoblin support in our server because it is a free, decentralized web platform (server software) for hosting and sharing many forms of digital media. It strives to provide an extensible, federated, and freedom-respectful software replacement to major media publishing services such as Flickr, DeviantArt, and YouTube.</p> <p>The platform successfully hosts and displays many sorts of media:</p> <ul style="list-style-type: none"><li>• As of version 0.3.1 it includes support for plain text (ASCII art), images (PNG and JPEG).</li><li>• HTML5 capabilities are widely used to play video and/or audio contained in WebM format; while FLAC, WAV and MP3 uploads are automatically transcoded to Vorbis audio and then encapsulated into WebM.</li><li>• 3D models support (preview and renderization) was added on 22 October 2012 and is achieved by means of HTML5 Canvas, Thingiview, WebGL and Blender.</li></ul>
