

libretools - Bug #1020

[librechroot] QEMU chroots don't support xattr syscalls.

2016-05-31 06:27 PM - lukeshu

Status: fixed	% Done: 100%
Priority: bug	
Assignee: lukeshu	
Category: ARM on x86	
Description qemu-arm-static seems to not support the xattr system calls (which means you get a screenful of errors everytime something runs cp -a). I guess the old qemu-linaro supported these system calls--perhaps we should port these to modern qemu?	

History

#1 - 2017-12-25 09:47 AM - lukeshu

- % Done changed from 0 to 90

- Assignee set to lukeshu

Because it was built with --disable-attr, which disables "attr and xattr support"!

#2 - 2018-01-03 06:59 PM - lukeshu

- % Done changed from 90 to 100

- Status changed from open to fixed

Fixed in qemu-user-static 2.11
