

Servers - Bug #1022

repo .db files disappearing from repo.parabola.nu for x86_64/i686 architectures

2016-06-02 03:42 PM - fturco

Status: fixed	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description I can't update my system because of the following error message when running "pacman -Syu": error: failed retrieving file 'community.db' from repo.parabola.nu : The requested URL returned error 404 In fact there is no community.db file under https://repo.parabola.nu/community/os/x86_64/ . Same on other mirrors.

Has the source of the problem been investigated/mitigated? I presume the same thing caused both occurrences

#5 - 2016-06-16 01:23 AM - isacdaavid

- Status changed from fixed to open

- Subject changed from community.db doesn't exist on repo.parabola.nu for x86_64 architecture to repo .db files disappearing from repo.parabola.nu for x86_64/i686 architectures

extra.db is also gone from <https://repo.parabola.nu/extra/os/i686/>.

I would like to think this was caused by interrupting db-import-archlinux-pkg
