<b>Description</b> since several months I have this problem with Qt Assistant, I'm not able to open it.  jorge@Abril:~\$ assistant Could not load translation file assistant_es_CR in directory /usr/share/qt/translations. Could not load translation file qt_help_es_CR in directory /usr/share/qt/translations. Object::connect: No such signal HelpViewer::printRequested() Object::connect: No such signal HelpViewer::printRequested() Violación de segmento jorge@Abril:~\$  I'm not quite sure why this error happens, because I could use Qt Assistant without any problem before

A few minutes ago, I tried open assistant again and i have the same problem, i will check it :S

#### #4 - 2012-05-22 07:53 AM - mtjm

<https://bugs.archlinux.org/task/29469> is this issue. 4.8.1-1 works (and doesn't crash the KDE screensaver). There is no information suggesting it being difficult to debug or fix.

#### #5 - 2012-06-28 08:40 AM - mtjm

4.8.2-2 fixed this.
