Description	
<p>Hi, the signup (clicking "create account") on the Parabola wiki isn't working. The "captcha" system, where you run a command to get a string output, tells me it was wrong.</p> <p>The command is, as of the time this bug was posted; <code>date -u +%V`uname` sha256sum sed 's/^W//g'</code></p> <p>On my machine I get the output: <code>b110d79692152b484533020a1145f2768e2f24340139bce6996a88b390e07a43</code></p> <p>Pasting this into the form and hitting enter tells me it is wrong..</p>

Like Necklace, I also have the same problem, is there any solution?

Al igual que Necklace, también tengo el mismo problema, ¿hay alguna solución?
