Description Into Parabola mate and Parabola in general. I would greatly appreciate this. And yes it is free software under the gpl license, download their app from their download area and you will see the license. but anyways I would greatly appreciate having this package. If you can bring it, I would be able to completely migrate to Parabola. Thanks in advance... :)

We could add [nitrokey-app](#) and maintain from [\[pcr\]](#) since it comes from AUR, however it is an optional repo and you need enable it from `/etc/pacman.conf`. What do you think?

Yes I would greatly appreciate that. :) just tell me how to enable it and I will do thus.

Thank you.

- Status changed from open to in progress

- Subject changed from I would like it if you could bring the nitrokey app from archlinux, to `[nitrokey-app] add package to PCR`

#5 - 2016-08-11 05:33 PM - calmstorm

There is one small problem though, It might be better to compile it from source from nitrokey

Because I learned the latest release on the arch site might not be up-to-date (0.4) is the latest version that arch should have I think.

Your thoughts?

This is where you would compile it from... <https://github.com/Nitrokey/nitrokey-app>

I don't know if that is too much work for you though.

Have you added the package yet?

#7 - 2016-08-29 10:58 PM - Anonymous

I'm on it right now...
