

Packages - Bug #1107

My Parabola OS doesn't update packages

2016-09-22 01:46 PM - libreuser

Status: fixed	% Done: 100%
Priority: bug

Description I tried to update GNU Parabola by: <pre>pacman -Syu :: Sincronizando las bases de datos de los paquetes.. libre está actualizado core está actualizado extra está actualizado community está actualizado :: Iniciando actualización completa del sistema.. ...el sistema ya está actualizado.</pre> But there is no new update for days. When they exist, for my installed packages,into the GNU Parabola web: [[https://www.parabola.nu/packages/?sort=-last_update]] For example: I have installed libjpeg-turbo 1.5.0-1, but the new version found (libjpeg-turbo 1.5.1-1) is not loaded by 'pacman -Syu'. Please help. :)

History

#1 - 2016-09-22 09:27 PM - brandons

When I had this problem today, I fixed it by checking the Mirror Status page at <https://www.parabola.nu/mirrors/status/>, looking at the list of "Successfully Syncing Mirrors," and then making sure that one of those mirrors was the first/top one listed in my /etc/pacman.d/mirrorlist file. At that point, pacman -Syyu found the updates.

I think this was explained in IRC.

tl;dr

A mirror is lagging behind. Whenever an update issue like this arises your local mirror list is suspect; compare it against

<https://www.parabola.nu/mirrors/status>.

It could take us a while before we update pacman-mirrorlist, however the website is constantly checking for mirror status. At

<https://www.parabola.nu/mirrorlist/> you can even ask the website to generate fresh, customized lists that leave outdated mirrors out (if you tick that option).
