Estoy probando cheese 3.22.1-1 para x86_64, y sí funciona.

Veo los mismos mensajes, pero no son críticos y la ventana de cheese sigue abierta. ¿Tú puedes ver la ventana arescorpio?

#4 - 2016-12-28 04:13 AM - arescorpio

Veo la ventana abierta de cheese pero no me reconoce ninguna de las 3 cámaras web que siempre use en parabola.nu ,porque no anda!

#5 - 2016-12-29 05:17 AM - isacdaavid

Hoy probé con una cámara y sí la reconoció. ¿Estás usando la misma instalación que antes? Podría estar faltando un driver o cargar un módulo al kernel: https://wiki.archlinux.org/index.php/Webcam_setup

Necesitamos más información para poder confirmar este bug.
