

parabola-hackers - Bug #1188

[parabola-hackrs-nshd] PAM configuration causes confusing "unknown user" messages.

2017-01-21 12:41 AM - lukeshu

Status: fixed	% Done: 100%
Priority: bug	
Assignee: lukeshu	
Category:	
Description Because if nshd says "no" (perhaps the password was wrong) it tries the next db backend (files or compat or whatever), where the user doesn't exist.

- Status changed from open to fixed

This has been resolved by having PAM only talk directly to it for the password stack (change password); and otherwise only talk to it through NSS.
