I think this error was fullpkg's fault. Will try again.

#3 - 2012-06-14 04:58 PM - mtjm

The currently available package stopped supporting PDF due to the poppler update, will try to build the newest version.

#4 - 2012-06-15 08:39 AM - mtjm

4.8.4-1 built fine and can open a PDF file.

- Project changed from 3 to Ports
