

Packages - Bug #1238

Iceweasel (hardened-preferences) does not load web pages well, but after refresh it does.

Description	
When I go to some web pages (like https://myreadingmanga.info/genre/bara/) the page doesn't show right. And I have to reload it a few times to see it properly. ☐☐	
That's quite odd. If it is because of javascript or something, it shouldn't work after a reload. Or if nothing is bad into the web, it should load properly at first. ☐☐
