- Subject changed from [ocl-icd] is no longer included in any repositories (custom repo), but it cannot be removed to [mesa-libcl-icd] needs to replaces=(ocl-icd)

For now: manually install mesa-libcl-icd.

mesa-libcl-icd mentions ocl-icd in conflicts=() and provides=(), but not replaces=(); and it needs to for upgrades to work.

#2 - 2017-03-20 06:19 PM - libreuser

Uh, I did:

```
pacman -S mesa-libcl-icd
```

```
" :: mesa-libcl-icd y ocl-icd están en conflicto. ¿Quitar ocl-icd? [s/N] " s
```

and it's solved now. ☺☺
(it didn't work with 'octopi')

Thanks! :)

Maybe, this message should be appear updating, for all packages that are no longer included in any repositories (custom repo):

```
" :: mesa-libcl-icd replace ocl-icd. Remove ocl-icd? [y/N] "
```

And users as me would need that the default answer were "yes", because it is what it should be done.

#6 - 2017-03-20 10:59 PM - lukeshu

Yes, that is what putting the line `replaces=(ocl-icd)` in the `mesa-libcl-icd` section of the `mesa PKGBUILD` would do.
