

Servers - Bug #1269

Full IPv6 support

2017-03-29 06:02 AM - lukeshu

Status:	not-a-bug	% Done:	0%
Priority:	feature		
Assignee:			
Category:			
Description Most of the servers correctly listen on IPv6, but neither host has a public IPv6 address configured. I think winston has an IPv6 range assigned though, just not configured with netctl. And of course, we'd need to configure an AAAA record paired with each A record.

History

#1 - 2017-04-14 06:17 PM - lukeshu

I just came here to open an IPv6 bug, and saw this issue... I have zero recollection of writing it.

#3 - 2017-04-15 04:51 PM - lukeshu

n1md4 informs me that an IPv6 address is not available for proton.

#4 - 2017-04-15 09:55 PM - lukeshu

The don't see anything about IPv6 in Winston's VPS control panel.

#5 - 2017-12-24 06:19 AM - lukeshu

- Status changed from open to not-a-bug

I am, sadly, closing this, because it seems unlikely.
