

## libretools - Bug #1283

### [tests] Consider moving away from roundup

2017-04-11 01:48 AM - lukeshu

<b>Status:</b> fixed	<b>% Done:</b> 100%
<b>Priority:</b> wish

<b>Description</b>	
I just spent way too much time tracking down a bug in roundup (the sh-roundup package), the test runner used in libretools. Your test framework is just about the last place where you want to have to deal with bugs.	
While I hate choosing things just because they are popular, I expect that shUnit2 and BATS are more battle-tested.	

#### History

##### #1 - 2017-04-11 03:58 AM - lukeshu

- Priority changed from bug to discussion

##### #2 - 2017-05-02 01:46 AM - lukeshu

Since writing this issue, upstream dbscripts switched from shUnit2 to BATS.

##### #3 - 2018-05-29 09:37 PM - lukeshu

Working with BATS in dbscripts: I'm reasonably happy with BATS. I think migrating from roundup to BATS would be reasonably straight-forward.

##### #4 - 2018-09-30 01:01 AM - lukeshu

- % Done changed from 0 to 60

- Priority changed from discussion to wish

- Assignee set to lukeshu

There's now a lukeshu/bats branch where I'm working on migrating the test suite to BATS.

##### #5 - 2018-10-02 05:22 PM - lukeshu

- % Done changed from 60 to 100

- Status changed from open to fixed

git's master is now using BATS.
