

Servers - Bug #1289

[Winston] VPS control panel complains about ACPI

2017-04-15 09:37 PM - lukeshu

Status: open	% Done: 90%
Priority: bug	
Assignee:	
Category:	
Description	
In the event log, whenever Winston reboots, we get this:	
Job completed. NOTE! Sýndarvélín keyrði ekki niður fallega. Vinsamlegast tryggjið að acpid þakkinn sé uppsettur á henni, til að hægt sé að keyra hana niður fallega.	

History

#1 - 2017-04-15 09:39 PM - lukeshu

- % Done changed from 0 to 90

I've installed, enabled, and started acpid. We'll see if it still happens next reboot.

#2 - 2017-12-24 06:18 AM - lukeshu

The message is now in English:

Job completed. NOTE! The vps did not shutdown gracefully. Please make sure acpid is installed to enable graceful shutdown.

But this still happens.
