

Packages - Bug #1305

Bug # 1301 (fixed): [icu] Please recompile the following package for solve dependences with ICU 59.1

[iceweasel] icu=58.2 dependency prevents update

2017-05-01 02:03 PM - odg

Status: fixed	% Done: 100%
Priority: bug

Description	
There's a dependency for "icu=58.2" when the latest icu package is 59.1. This means pacman can't update icu, and so halts a full system update, when iceweasel is installed unless I set pacman to IgnorePkg=icu. The original firefox package in the arch repos doesn't specify a version number, its dependency is just "icu"
