

Packages - Bug #1308

ruby-2.4.1 built against openssl-1.0, but depends on openssl

2017-05-02 03:04 PM - oaken-source

Status: fixed	% Done: 100%
Priority: bug	
Assignee:	
Category:	
Description the latest ruby build depends on openssl, which is currently openssl-1.1, but was linked against openssl-1.0. this results in problems like: <pre># ldd /usr/lib/ruby/2.4.0/x86_64-linux/digest/sha1.so libcrypto.so.1.0.0 => not found</pre> unless openssl-1.0 is installed explicitly alongside. this blocks #1307 , because the build depends on a working ruby.
