

Packages - Freedom Issue #132

DuckDuckGo and IxQuick are non-free search providers

Description DuckDuckGo and IxQuick may be freedom-friendly, but unfortunately they're nonfree (as can be ascertained by GNU LibreJS). A free-as-in-freedom replacement would be Seeks (http://www.seeks-project.info/search.php/websearch-hp).

The relevant package is [mozilla-searchplugins]. I'll remove the SSL version of DDG, but leave DDG lite, which is non-js. IxQuick isn't a default in said package, if it's in your browser, you added it. I'll also add Seeks.
