empathy: error while loading shared libraries: libcui18n.so.58: cannot open shared object file: No such file or directory

Hi, What repository it is empathy, of Extra or Nonprism?
If it is "extra" we cannot rebuild, because it is a repository of archlinux.

Hi, it is empathy package from **nonprism** repository.

Rebuild empathy package new version: 3.12.12+111+g3300c6deb-1.nonprism2

Thank you for your effort. Unfortunately, the bug persists.

#5 - 2017-05-20 08:11 PM - oaken-source

can not reproduce with latest empathy from nonprism. do you still experience the error?

I see some library errors related to extra/folks which should probably be reported upstream, but nothing directly related to empathy.

#6 - 2017-05-20 08:58 PM - Anonymous

No. It was fixed.

#7 - 2017-05-20 10:06 PM - oaken-source

- % Done changed from 0 to 100

- Status changed from open to fixed
