<b>Description</b> Gajim software depends on <b>python-farstream</b> and <b>gststreamer-plugins-bad</b> for audio/video support (See <i>Help &gt; features</i> ). However, this is not listed in the optional dependences of <b>gajim</b> package.  - Gstreamer-plugins-bad seems to match the <b>gst-plugins-bad</b> package; - Python-farstream does not seem to be in the our repositories.

to be clear 'gajim' is an arch package - the arch bug report was closed 'not-a-bug' - neither of the [#1327](#) sub-tickets have a resolution  
do these problem still exist with the latest gajim?
