

Packages - Bug #134

[cups-filters-libre] built for i686 in x86_64 package

2012-06-13 06:29 PM - mtjm

Status: fixed	% Done: 0%
Priority: broken	
Assignee:	
Category:	
Description	
On x86_64:	
<pre>\$ file /usr/lib/cups/filter/pdftopdf /usr/lib/cups/filter/pdftopdf: ELF 32-bit LSB shared object, Intel 80386, version 1 (SYSV), dynamically linked (uses shared libs), for GNU/Linux 2.6.32, BuildID[sha1]=0xd32325f33f382bc29360fa85d77d00977b342568, stripped \$ pacman -Qo /usr/lib/cups/filter/pdftopdf /usr/lib/cups/filter/pdftopdf jest własnością cups-filters-libre 1.0.18-2</pre>	
I believe the package should have x86_64, not i686 binaries.

Where is PKGBUILD and files of this package? it aren't on abslibre

#3 - 2012-06-16 11:00 PM - Jorginho

The problem is solved in the new PKGBUILD version.
