| <b>Description</b><br>the default theme 'Parabola' seems to be missing some definitions compared to the previous 2016-11 edition - see screen-shot |                   |

#### History

here is one possible cause - it looks like the mate desktop went through a major over-haul going from the version in the previous ISO (1.16.1) to this one (1.18.0)

according to the release notes <http://mate-desktop.org/blog/2017-03-13-mate-1-18-released/>

The entire MATE Desktop suite of applications and components is now GTK3+ only!

this could explain any missing definitions - the definition of the default theme is /root/.themes/Parabola/index.theme

another possibility is that like [#1340](#) perhaps there is a patch missing from this ISO  
the following patch is the parent commit of the missing patch mentioned in [#1340](#) and look like it deals with the theme

- Subject changed from 2017-05 mate ISO default theme is broken to [systemd][mate] ISO default theme is broken

##### #4 - 2018-01-09 10:42 PM - bill-auger

- Subject changed from [systemd][mate] ISO default theme is broken to [systemd][mate]: ISO default theme is broken

to be clear, only the Live environment is affected - a fully installed mate system does not exhibit this
