**Description**

Hi, I've been trying to compile Icedove and Iceweasel for ARM, as it is too outdated. It looks like there's an issue with the patches, here are the logs.

## History

**#1 - 2017-06-21 06:31 PM - Megver83**

*- File iceweasel-1_54.0-3-armv7h-prepare.log added*

**#2 - 2017-06-21 06:54 PM - oaken-source**

*- Assignee set to oaken-source*

my beaglebone will arrive tomorrow, then I'll be able to take a look at the arm builds of the ice* packages.

**#3 - 2017-06-22 12:50 AM - Megver83**

if it's useful to mention, I tried this in my Banana Pi M1

**#4 - 2018-02-13 03:35 PM - Megver83**

*- Subject changed from [Icedove][Iceweasel] Impossible to compile for ARM to [Icedove][Iceweasel] Cannot build for ARM*

Any updates on this? It's been 8 months since this issue was reported and, as you may know, some ppl have asked about this on IRC

**#5 - 2018-02-13 03:53 PM - oaken-source**

the pkgbuilds are finished and should be building. I'm building in a vm at the moment and it takes a long time. However, I am getting stronger arm hardware this week, that should speed this up.

**#6 - 2018-02-15 06:15 AM - oaken-source**

*- % Done changed from 0 to 100*

*- Status changed from open to fixed*

armweasel is up.
