Description Hi, some Epson printers are not supported by Parabola. Debian has a package for it here: https://packages.debian.org/stretch/printer-driver-escpr According to their copyright file, it is free software: http://metadata.ftp-master.debian.org/changelogs/main/e/epson-inkjet-printer-escpr/epson-inkjet-printer-escpr_1.6.11-1_copyright So I created a PKGBUILD, by taking inspiration from the gutenprint PKGBUILD. Denis.
