

pacman2pacman - Bug #1406

add an option to blacklist .db.sig

2017-07-08 09:31 PM - xylon

Description	
<p>pacman asks pacman2pacman to download .db.sig files, which Parabola does not use. This creates error messages that worry users.</p>	
<p>It would be nice to add an optional config setting to make it return instantly and silently when asked to download a .db.sig file.</p>	
<p>It must be an optional setting so that it can be changed in future and so that pacman2pacman can be used in other Arch-derivatives.</p>
