pacman2pacman - Bug #1407

clarify messages regarding http(s) downloads

2017-07-08 09:34 PM - xylon

Description
when downloading directly from a mirror, (for .db files or when a torrent stalls) it displays "Pacman2pacman http download:" this is misleading as it implies the download is HTTP, as opposed to HTTPS. In fact the download uses whichever protocol is specified in the mirrorlist line.
