| <pre>\$ ssh ssh: error while loading shared libraries: libgssapi_krb5.so.2: cannot open shared object file: No such file or directory \$ ldd `which ssh` libcrypt.so.1.0.0 => /usr/lib/libcrypto.so.1.0.0 (0x77078000) libdl.so.2 => /lib/libdl.so.2 (0x77064000) libldns.so.1 => /usr/lib/libldns.so.1 (0x77008000) libz.so.1 => /usr/lib/libz.so.1 (0x76fe0000) libgssapi_krb5.so.2 => not found libc.so.6 => /lib/libc.so.6 (0x76e64000) /lib/ld.so.1 (0x77240000)</pre> | |

History

#2 - 2012-06-28 11:53 AM - sinister

My machine is Yeeloong.

#3 - 2012-06-28 02:00 PM - mtjm

```
$ pacman -Qo /usr/lib/libgssapi_krb5.so.2
/usr/lib/libgssapi_krb5.so.2 is owned by krb5 1.10.2-2
```

Which version do you have?

#4 - 2012-06-28 02:41 PM - sinister

```
# pacman -Ss krb5
core/krb5 1.10.2-2 [installed]
    The Kerberos network authentication system
```

```
# pacman -Ql krb5
error: could not open file /var/lib/pacman/local/krb5-1.10.2-2/files: No such file or directory
```

I re-installed krb5 like this:

```
pacman -Sf krb5
```

That was strange but it looks like everything is OK now :-)
