<b>Description</b>	
<p>The post-install creates user &amp; group 'xbmc', but the installed systemd service expects user 'kodi'. The post-install needs to be updated to create user / group 'kodi' instead.</p> <p>After installation, I had to do this to fix it:</p> <pre>sudo usermod -l kodi -d /var/lib/kodi -c "Kodi user" xbmc sudo groupmod -n kodi xbmc</pre> <p>See also the AUR package: <a href="https://aur.archlinux.org/cgit/aur.git/tree/readme.install?h=kodi-standalone-service">https://aur.archlinux.org/cgit/aur.git/tree/readme.install?h=kodi-standalone-service</a></p>
