Packages - Bug #1434

[texlive]: file owned by 2 packages simultaneously

2017-08-07 01:11 PM - korobkov

Status:	fixed	**% Done:**	0%

Description

I've installed texlive group and after last upgrade to texlive-2017 have:

```
error: file owned by 'texlive-latexextra' and 'texlive-science': 'usr/share/texmf-dist/tex/latex/textgreek/textgreek.sty'
```

Looks like some conflict between versions from archlinux and parabola.
