| <b>Category:</b>                                                                                                                                                                                                                                                                                         |                     |
| <b>Description</b><br>gtk-equinox-engine is required by trisquel-themes at [elementary] repo, but there isn't a 64 bits version of the packages, thus gtk2 doesn't work. Also, the package seems to be orphan. (I don't know if this count because I don't know how official is the Elementary repo atm) |                     |

#### History

---

##### #3 - 2012-08-09 01:26 AM - Anonymous

It is impossible to compile due that PKGBUILD was created to compile on february aprox and our distro had a lot of updates from that date to today, so is necessary check a revision of this and create parches to compile correctly

##### #4 - 2015-04-29 07:45 AM - ovruni

- % Done changed from 0 to 100
- Assignee set to ovruni
- Status changed from open to fixed

gtk-engine-equinox is in pcr now
