

## Packages - Bug #1446

**[virt-manager] Wizard does not allow to move Forward from OS selection page, always says "Please specify a valid OS variant"**

2017-08-21 12:29 AM - nRoof

<b>Status:</b> fixed	<b>% Done:</b> 100%
<b>Priority:</b> bug	
<b>Assignee:</b> ovruni	
<b>Category:</b>	
<b>Description</b>	
Steps to reproduce: <ol style="list-style-type: none"><li>1. Open virt-manager and make sure that the connection is added (for example, QEMU/KVM).</li><li>2. Click to create new VM (either using the appropriate button from the toolbar, or using File - New Virtual Machine).</li><li>3. Click Forward in the appeared popup (it doesn't matter which one of the radio-button options is selected).</li><li>4. If asked to select an image, select existing or create new.</li><li>5. Click Forward (it doesn't matter which OS Type and Version are entered in the boxes on that page).</li></ol>	
Expected results: The next screen is shown, it's possible to successfully create a new VM using this wizard.	
Actual results: The following popup message is shown:	
<pre>Please specify a valid OS variant</pre>	

### History

#### #1 - 2017-08-21 12:35 AM - nRoof

Not sure if it's an issue of virt-manager itself, or one of its dependencies, like virt-install.

#### #2 - 2017-09-09 03:42 PM - ovruni

- % Done changed from 0 to 100
- Assignee set to ovruni
- Status changed from open to fixed
- Due date set to 2017-09-08
