Description Description: SleepyHead is cross platform, free software sleep tracking program for reviewing CPAP and Oximetry data, which are devices used in the treatment of Sleep Disorders like Obstructive Sleep Apnea. License: GPLv3 (the AUR page licence is ambiguously labelled "GPL", see: https://gitlab.com/sleepyhead/sleepyhead-code/blob/master/COPYING) AUR: https://aur.archlinux.org/packages/sleepyhead/ AUR (-git): https://aur.archlinux.org/packages/sleepyhead-git/ Website: http://sleepyhead.jedimark.net/ Code: https://gitlab.com/sleepyhead/sleepyhead-code I, thankfully, don't suffer from Sleep Apnea or require a CPAP device but I know others who do. I think this would be a good addition :). The AUR packages do seem to work fine on my end.	

History

I think I forgot to mark this as a packaging request, apologies if this suddenly appears in the bugs section.

#2 - 2017-08-29 12:34 PM - freemor

I use a CPAP and SleepyHead. It is excellent software and would be a good addition to PCR so +1
