Users need to add bridges like this if they want to use obfs4 with Tor:

```
ClientTransportPlugin obfs4 exec /usr/bin/obfs4proxy
```

Edit: I mistyped do **NOT** add this, your Tor bridges won't work and you won't be able to connect to the Tor network. You need to add "managed" on the end:

```
ClientTransportPlugin obfs4 exec /usr/bin/obfs4proxy managed
```
