Try installing ocl-icd

#2 - 2017-09-25 07:16 PM - bill-auger

on one box i have inkscape Version 0.92.2-2 and that failed missing libLLVM-3.9.so - - that is available in 'llvm39-libs' - this is not the box i had trouble with yesterday though

on the other box i have the latest (newer) inkscape version 0.92.2-3 that wants the older libLLVM-3.8.so in the missing 'llvm38-libs' package

installing 'ocl-icd' also made it work in both cases but it made me remove 'mesa-libcl'

```
$ sudo pacman -S ocl-icd
....
looking for conflicting packages...
:: ocl-icd and mesa-libcl are in conflict (libcl). Remove mesa-libcl? [y/N] Y
....
```

are you packaging this ovruni? looks like maybe just change the dependencies? i dunno but thanks it is working
