

Packages - Bug #1517

[gnome-boxes] depends on nonexistent package [libtracker-sparql] cannot be installed

2017-11-04 02:08 PM - ToffeeYogurtPots

Status: fixed	% Done: 100%
Priority: bug	
Assignee: isacdaavid	
Category:	
Description Tested on multiple machines and one near-stock virtual machine. Seems like gnome-boxes dependencies are outdated. Arch's package doesn't even depend on libtracker-sparql: https://www.archlinux.org/packages/community/x86_64/gnome-boxes/	
Steps to reproduce: 1. Run "pacman -S gnome-boxes". <pre>[user@hostname ~]\$ sudo pacman -S gnome-boxes [sudo] password for user: resolving dependencies... warning: cannot resolve "libtracker-sparql", a dependency of "gnome-boxes" :: The following package cannot be upgraded due to unresolvable dependencies: gnome-boxes :: Do you want to skip the above package for this upgrade? [y/N] y looking for conflicting packages... there is nothing to do</pre>

it had not even been 3 weeks since i [last updated](#) to the latest version in Arch, which still was 3.24 at the time anyway, this should be fixed now. wait a bit before 3.26 shows up in mirrors.

Thanks for fixing it. I'll try it later when it's dispersed across the mirrors. Forgive my ignorance but is there no way to automate dependency changes? I'd imagine it would make things a lot easier.
