

Packages - Bug #153

Make new base tarball

2012-07-24 12:16 PM - mtjm

Status: not-a-bug	% Done: 0%
Priority: critical	
Assignee:	
Category:	
Description First update glibc to one using /usr/lib, update pacman to verify signatures and update all packages that would be in the tarball. Maybe check if recent Arch installation changes can help simplify librebasebuilder. (Using the bug priority since the recent changes make updating more difficult.)	

History

#2 - 2012-09-13 07:35 AM - mtjm

The new base of 20120912 is updated, was made with unsigned packages. I haven't checked the Arch changes.

#3 - 2013-06-06 06:02 AM - mtjm

At least some of the problems in the <https://lists.parabolagnulinux.org/pipermail/assist/2013-June/thread.html#144> thread should be solved in a new base tarball. I think we should do the/sbin -> /bin move first.
