Category:	
Description	
Running Librebooted, T400, running the full system upgrade, the following	
Upgrading package python2-pyopenssl (17.3.0-1 => 17.4.0-1), causes Gajim to fail to open, running trace back present the following	
Traceback (most recent call last): File "gajim.py", line 307, in <module> OpenSSL.rand.load_file(str(RNG_SEED)) AttributeError: 'module' object has no attribute 'load_file'	
Downgrading python2-pyopenssl (17.4.0-1 => 17.3.0-1) corrects this issue and gajim runs as before.
