Description I have an issue related with the search function on Iceweasel 57.0.1, which is the malfunction of search feature. The problem is shown in the following scenarios: 1.- When a word o phrase is highlighted and click "Search '[highlighted text]' in [chosen search engine]" 2.- In the usage of search box and/or omnibox. 3.- In the search box of the default homepage of Iceweasel.

do these things occur on a clean profile? Do you have additional search engines installed / enabled that might be incompatible?
