hi,

actually the conflict is with gstreamer0.10-python. the error message should be read as:

```
"gstreamer0.10-python won't allow python2-gobject2 2.28 to install, because it requires pygobject 2.20 (python2-gobject2 is part of the pygobject macro-package)"
```

since gstreamer0.10-python is not an official package you should probably close <https://bugs.archlinux.org/task/56748>. the solution is to update your AUR package.
