Description

Hi,
These packages should be rebuilt to use the latest version of boost-libs, because at this moment they crash (in Epiphany) while looking for the 1.64.0 version:
 	
`Error loading module '/usr/lib/mozilla/plugins/liblightsparkplugin.so': libboost_filesystem.so.1.64.0: cannot open shared object file: No such file or directory`
`Error scanning plugin /usr/lib/mozilla/plugins/liblightsparkplugin.so, /usr/lib/webkit2gtk-4.0/WebKitPluginProcess returned 256 exit status`
`Error loading module '/usr/lib/mozilla/plugins/libgnashplugin.so': libboost_iostreams.so.1.64.0: cannot open shared object file: No such file or directory`
`Error scanning plugin /usr/lib/mozilla/plugins/libgnashplugin.so, /usr/lib/webkit2gtk-4.0/WebKitPluginProcess returned 256 exit status`
 	
Happy new year :)

[gnash-git] [lightspark-git] Need a rebuild using boost-libs 1.66.0-1

Hi again Parabola, now that boost-libs has upgraded, these two packages need to be built again. Isn't there a way to do it automatically when dependencies versions change ?

Peace & freedom,
Félicien

Yeah this is still an issue. I mistakenly thought it would be fixed if boost-65-compat were added to the PCR, but that is not the case.

#5 - 2018-03-07 03:37 PM - felicien

Hi again, the packages still haven't been rebuilt… Couldn't this ticket be re-opened, so it moves in the queue ? If I can help in any way, let me know.
