Description	
<p>These two packages have been recently added to Arch in favour of the older doublecmd-qt package for Qt 4.</p> <p>doublecmd-qt is already in the blacklist, but there is a replacement package with the same name in libre (BTW, it's currently marked as outdated).</p> <p>It would be great to replace libre doublecmd-qt with liberated packages doublecmd-qt4 and especially doublecmd-qt5, similar to what Arch did.</p>
