Description			
[parabolapc@parabolapc ~]\$ clementine clementine: error while loading shared libraries: libcdio.so.16: cannot open shared object file: No such file or directory [parabolapc@parabolapc ~]\$			

History

#1 - 2018-01-26 01:31 PM - oaken-source

- % Done changed from 0 to 100
- Assignee set to oaken-source
- Status changed from open to fixed

fixed in clementine-1.3.1-12.parabola1

#2 - 2018-01-27 12:29 AM - arescorpio

- Subject changed from clementine no funciona to clementine Si funciona

thanks oaken-source, clementine is already working correctly.

#3 - 2018-01-27 02:47 AM - arescorpio

- Subject changed from clementine Si funciona to clementine NO funciona

I'm very sorry, I'm sorry clementine when it is released for a few brief minutes it hangs up and does not give any error data about it which makes it unusable clementine

#4 - 2018-01-27 02:48 AM - arescorpio

clementine it does not work

#5 - 2018-01-27 02:49 AM - arescorpio

- Subject changed from clementine NO funciona to clementine it does not work

#6 - 2018-01-27 02:52 AM - arescorpio

I hope that this clementine error is not also an internal error of the desktop that I use: enlightenment

#7 - 2018-01-27 06:27 AM - oaken-source

- % Done changed from 100 to 50
- Assignee deleted (oaken-source)
- Status changed from fixed to info needed

I can not reproduce this error. I'll leave this open for now until we get more data.

#8 - 2018-01-31 03:48 AM - arescorpio

Clementine throws itself without problems starting with the loaded songs reproducing them without problems. When a few minutes passes unexpectedly, a message appears saying # "clementine unexpectedly closed due to a bus error". That is the only information it gives.

#9 - 2018-02-01 12:11 AM - arescorpio

Error Signal Information:

clementine fue interrumpido por un error de Bus.
Clementine was interrupted by a Bus error.

Output Data:
There was no output

Error Logs:
There was no error message

I already received the three dbus updates today, but the problem persists that clementine hangs

#10 - 2018-02-17 01:56 AM - arescorpio

- *Subject changed from clementine it does not work to clementine it work very good! Solventado*

Finally, it works very well "Clementine" after the latest updates on qt5 and associated (more than 75) that I had. I appreciate all the help received.
Let's move forward with freedom + software privacy.
