<b>Description</b> signature from "Andreas Grapentin " is unknown trust  after pacman -Syu	

#### History

##### #1 - 2018-01-26 05:46 AM - oaken-source

Hi, this is me.

The key I use to sign packages has expired, but has since been extended for another 6 months.

So you can easily fix this error by running `sudo pacman-key --refresh-keys`, as part of your regular system maintenance.

I think there might be something we could do on our side to mitigate this, like a pacman-keyring update maybe. I'll ask the other maintainers how this was handled in the past.

##### #2 - 2018-01-26 06:29 AM - bill-auger

that can be automated by rebuilding the keyring package so that users are forced to pull the update - even if the keys have not changed, the `--refresh-keys` command is run automatically during as a post-installation hook - i think this can be forced to happen simply by pushing an empty commit to the 'hackers.git' repo

##### #3 - 2018-01-26 06:55 AM - oaken-source

I tried to do that, but the autobuilder broke.

##### #4 - 2018-01-26 10:04 AM - bill-auger

like this? <https://labs.parabola.nu/issues/1615>

##### #5 - 2018-01-26 10:10 AM - oaken-source

no, I think that is an unrelated issue.

##### #6 - 2018-01-27 06:25 AM - oaken-source

- % Done changed from 0 to 100

- Status changed from open to fixed

this should be fixed with the latest parabola-keyring update.
