

## Packages - Freedom Issue #1648

### [awesome-terminal-fonts] has logos for non-free software.

2018-02-25 03:29 PM - EeeParabola

<b>Status:</b> fixed	<b>% Done:</b> 100%
<b>Priority:</b> freedom issue	
<b>Assignee:</b> freemor	
<b>Category:</b>	
<b>Description</b> The package awesome-terminal-fonts is indeed distributed under the MIT license, however, it contains logos for non-free software like Chrome and Firefox. Is this something that should be fixed?  You can check all logos this package has here: <a href="https://fontawesome.com/cheatsheet">https://fontawesome.com/cheatsheet</a>

#### #4 - 2019-06-10 01:50 AM - freemor

Took a quick look at this today.

the PKGBUILD just downloads a .tar.gz and then stuffs the file into the right directories.

this font pack is a combination of several font sets.

Removing the offending fontsets from this leaves basically nothing left

The entire purpose of this package is Logo and very logo like glyphs. So completely trivial eye candy.

I think the best action is to blacklist this package. However this is another one of those, libre software vs libre culture as I suspect TTF fonts are considered non-functional data, and thus fall into the art and other things category.

I'll wait for other to chime in but if there is no input over the next little while I'll just go ahead and blacklist this and close this BR and it's duplicate.

#### #5 - 2019-06-12 04:18 PM - freemor

- % Done changed from 0 to 100

- Assignee set to freemor

Blacklisted both awesome-terminal-fonts and lsd (which depends on it)

see [#2331](#) for more details.
