

## Packages - Freedom Issue #1653

### [jdk9-openjdk][jre9-openjdk] Probably non-free the same way as (jdk|jre)(7|8)-openjdk

<b>Description</b>	
Well, to be honest, I don't know the exact reason why Parabola maintains jdk / jre versions 7 and 8 in libre and blacklists these packages from Arch. In blacklist.txt they are marked as [branding][FIXME:description].	
So probably jdk9-openjdk and jre9-openjdk have the same freedom issues as versions 7 and 8.	

#### History

As I understand, this issue can also be applied to jre9-openjdk-headless, and newly released jdk10-openjdk, jre10-openjdk and jre10-openjdk-headless, which all came from Arch.

blacklist.txt says it's just a branding change, not a real freedom issue.

Looking at openjdk8, it looks like the only change is replacing archlinux-java with parabola-java in the install scripts. Since we ship a archlinux-java compatibility alias, that shouldn't be necessary. I think we should just ship Arch's versions of openjdk, and drop libre/java{7,8}-openjdk.

##### #3 - 2018-10-12 04:25 AM - ovruni

- Status changed from open to not-a-bug

##### #4 - 2018-10-23 04:49 PM - ovruni

java7 and java8 were removed from blacklist
