

## Packages - Bug #168

### [kdelibs-libre] a version for libre-testing is in libre in abslibre.git

<b>Status:</b> fixed	<b>% Done:</b> 100%
<b>Priority:</b> bug	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Description</b> Scripts like the ones used on mips64el will want to build it for libre, while it probably should be only in libre-testing. We probably need a different long-term solution for this.

Now, that package is now on [libre] repo. Sorry for the inconvenience, the next time, i will put new changes on [libre-testing] on abslibre if that package is for [libre-testing] repo.
