Packages - Bug #177

repos don't provide file lists (for pkgfile)

Description

If I try

```
pkgfile -u
```

I get errors like

```
warning: download failed: http://repo.parabolagnulinux.org/core/os/x86_64/core.files [HTTP 404]
```

This makes pkgfile somewhat useless on Parabola. Is it possible to provide those ".files" files on Parabola mirrors?

I note that the libre repository does include libre.files. Just the other ones aren't being generated/copied.
