Description			
Hi,			
uboot4extlinux-a20-olinuxino-lime2 works on a lime2 with eMMC, but this results in the eMMC not being seen by u-boot and Linux.			
The best way to add support for the emmc would be to add a new package named uboot4extlinux-a20-olinuxino-lime2-emmc which would use u-boot's 'A20-OLinuXino-Lime2-eMMC_defconfig' (which is the configuration the eMMC version is supposed to use) instead of 'A20-OLinuXino-Lime2_defconfig' (which is for the version without eMMC).			
Denis.			

History

#1 - 2018-05-01 03:24 PM - GNUtoo

I forgott to add that this bugreport applies to the ARM architecture version of Parabola.

#2 - 2018-07-19 03:01 AM - ovruni

- Priority changed from bug to wish

#3 - 2019-02-21 09:49 AM - GNUtoo

- Assignee set to GNUtoo

#4 - 2019-02-21 09:50 AM - GNUtoo

- Status changed from open to fixed

Pushed in git, newer uboot4extlinux-sunxi packages are being tested before being added to the repository.
