Category:	
Description	
<ul style="list-style-type: none">Way to reproduce \$ pacman -Syu abiword \$ abiword	
Maximize the window (no need to open document)	
<ul style="list-style-type: none">Present behaviour The top part of the window, including the menus and part of the "blank page" flicker on my screenDesired behaviour No flickerAdditional information \$ uname -r 4.14.36-gnu-1-lts	
\$ abiword --version 3.0.2	
\$ gtk-launch --version 3.22.30	

History

#1 - 2018-06-28 11:30 AM - bill-auger

- Status changed from open to fixed

fixed by applying a patch from debian

<https://sources.debian.org/patches/abiword/3.0.2-6/>

<https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=851052>

note from the debian bug ticket:

Note that this doesn't work with Wayland

a version of this patch is attached to the upstream bug ticket still un-merged

https://bugzilla.abisource.com/show_bug.cgi?id=13791

#2 - 2018-06-28 01:40 PM - bill-auger

archlinux32 just opened a ticket on archlinux with a similar patch

<https://bugs.archlinux.org/task/59169>
